Personal experience in MALCS Film Club and course CLIT7801

Learning and exploring cinematic arts in MALCS Film Club and the experiential course is an interesting and unforgettable journey for me. Through the wonderful process of collective watching, interactive discussion, and independent writing, we study how to feel, touch, read the kaleidoscopic filmic narrative, the people in multicultural, transnational context, the urban and environmental life in global and historical space, experientially and academically. I am very grateful for the inspiring support and guidance from our instructor who taught me how to interpret a film text professionally and critically.
